To Whom It May Concern:

It has recently come to my attention that the Education Invention Centre of Canada manages the Algoma University Campus in Brampton, Ontario, and that through this organization the University is offering accelerated degree programs in the computer sciences and business fields.

As you may be aware, many of my constituents are newcomers whose academic credentials are not recognized by Canadian institutions. Accelerated degree programs are of great value to such individuals as they strive to gain the experience and educational background necessary to succeed in Ontario's highly competitive business environment.

It is always a pleasure to support programs and organizations that assist newcomers in the struggle to thrive in their new home. For this reason, I commend the Education Invention Centre's mission and offer my support to their program.

Sincerely,

Dr. Kuldip S. Kular, MPP
